

TRUPOTAN[®] RW

Basis:	Modified polymer.
Appearance:	Light-brown viscous fluid.
Charge:	Anionic.
Active matter:	Approx. 25 %.
pH value (1:10):	Approx. 4.5.
Light fastness:	Excellent.
Heat yellowing:	Excellent.

Properties

TRUPOTAN RW is a polymeric agent with elastomeric properties, excellent filling characteristics and soft mellow handle, that fills preferently the loosest areas of the hide.

TRUPOTAN RW can be used alone or in combination with other tanning agents.

TRUPOTAN RW has a high stability in all pH ranges and, therefore, it has a wide range of application.
