

TRUPOTAN[®] UM

Retanning for all types of leather

Basis:	Modified polymer.
Appearance:	Light-brown viscous liquid.
Charge:	Anionic.
Active matter:	approx. 25 % .
pH value (1:10):	approx. 4.5.
Light fastness:	Excellent.
Heat yellowing:	Excellent.

Properties

TRUPOTAN UM is a polymeric agent with elastomeric properties, excellent filling characteristics and soft mellow handle, that fills preferently the loosest areas of the hide.

TRUPOTAN UM can be used alone or in combination with other tanning agents.

TRUPOTAN UM has a high stability in all pH ranges and, therefore, it has a wide range of application.
