

TRUPOFIN[®] TOP PU MATT 20

Nature:	Waterborne matt polyether aliphatic urethane.
Appearance:	White opaque liquid.
Charge:	Anionic.
pH:	Approx. 8.0.
%Total solids:	Approx. 16.5.
Viscosity:	< 500 cP.

Properties

TRUPOFIN TOP PU MATT 20 is urethane aliphatic emulsion with very fine particles, free from surfactants and plasticizers

TRUPOFIN TOP PU MATT 20 gives the surface of the leather a moderate and very pleasant matt finish, silky and warm to touch

This characteristic will be especially appreciated in upholstery finishes for cars and furniture.

TRUPOFIN TOP PU MATT 20 added as a component to preparations of pigmented base coats give the finishes a very natural aspect.

If a crosslinker is used, the preparation will have a limited life.

For car and furniture upholstery leather as a matt top.

To regulate the degree of matting combined with glossy urethanes both in base coats and tops.

TRUPOFIN TOP PU MATT 20 applied on leather gives a natural aspect and warm-silky touch.

As a matt top for any type of finish with high fastness requirements.

Storage: The product can be stored for one year, as long as it is kept at temperatures above 5° C and below 40° C. Extended periods of storage or extreme temperatures may modify its

aspect, which can be remedied by stirring the product thoroughly before application.
